

Koda Bear Sherrell

February 12, 2011 - May 15, 2024

Koda Bear passed on to the rainbow bridge on 05/15/ 2024 after being diagnosed with Cushing's disease . He was 14 years old.

The moment I saw Koda and his cute little fluffy face I knew he would be mine, and have me wrapped around his tiny paw.

Koda had the magical ability to brighten up anyone's day that met him with his French fry catching skills and his zoomie spins.

He would never play with dog toys but if you gave him a baby blanket it was tug of war until he curled up into a little ball and went to sleep. He refused to go outside when it rained, yuck to dirty paws! He was never an ankle biter, but he sure would lick you until you had to walk away laughing as he chased you. He's been my loyal companion And by my side for 14 years, 2 kids, and when I became very ill. My heart as not known a more loyal soul or a greater love, I will never have a dog quite like him again.

I hope he is happily chasing the Stars somewhere, and no longer in pain.

Oh Koda Bear I have loved you, your whole life and will miss you the rest of mine -
