REMEMBERING Mona

We rescued Mona back in 2010. She was very unique. She was born with half of her front legs. But that didn't stop her from getting around and boy was she feisty. You didn't want to get close to her baby moose toy or her mom and dad when she was snuggling. Her daily ritual consisted of sunbathing, hopping around the yard, and the occasional car ride. We sure will miss you!! Love Mom and Dad
