

Star Atnip

January 23, 2014 - August 30, 2024

We had to say goodbye to our best friend Star of four years on August 30th, of 2024. She was the best thing that happened to us and she was one of a kind to us. Star was a beautiful sassy girl. Towards the end Star had issues with tumors on her throat and to her lungs. We were honored that we could provide a peaceful way for her to go and finally rest. It feels different now an empty spot on her bed and no more happy paws. No more loud snoring. No more stinky farts. However I know she is watching over us and with our family up in heaven.

Dallas Pets Alive brought Star into our lives. I first fostered Star in 2021 and she came with some issues. She had deteriorated teeth in the front and she had tumors located on her rear hind and on the side of her belly. You could also tell she was bred way too many times. She also had scabs on a few spots on her body. She spent sometime with my cousin and I. Spent her time getting to know my husband as well. We eventually had one application on her but then turned Star away. We eventually were foster failures and adopted her in May of 2021. She has an approximate birthdate of January 23rd of 2014.

She had the best 4 years of her life with us. We got to share my pregnancy with her. There was times she would lay next to me and put her head on my belly. She got to share a couple years with our son. Star would play like a

champ and would have the zoomies till she couldn't no more. She loved food soooo much. She was a sweet sassy girl. She was loved by so many of our friends and family.

We love you forever and always
